

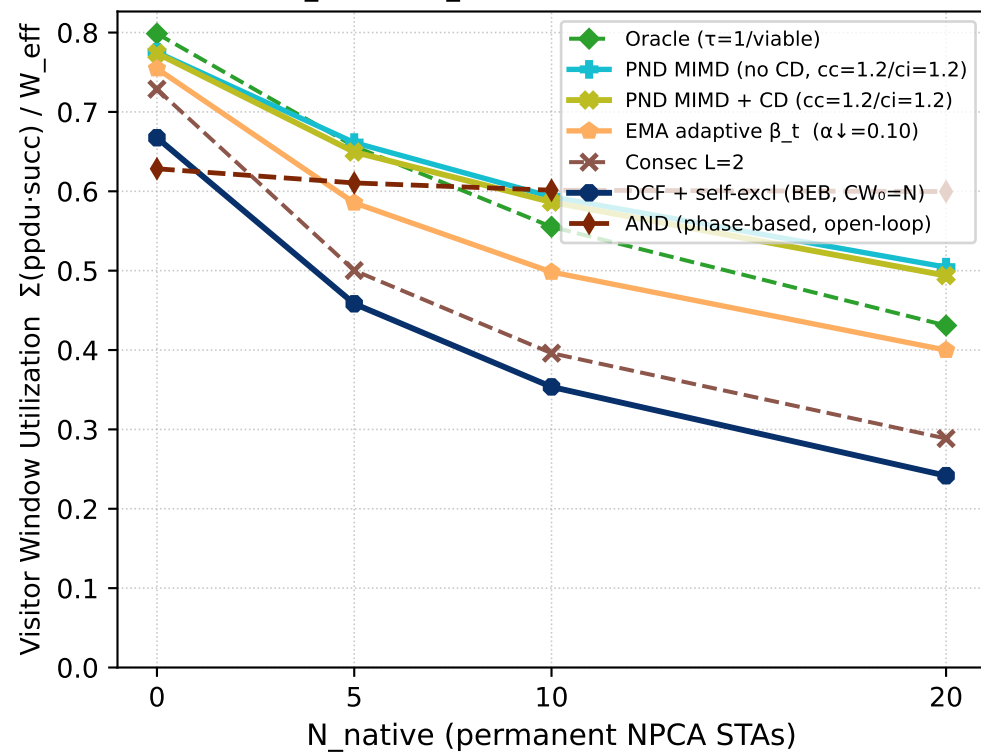

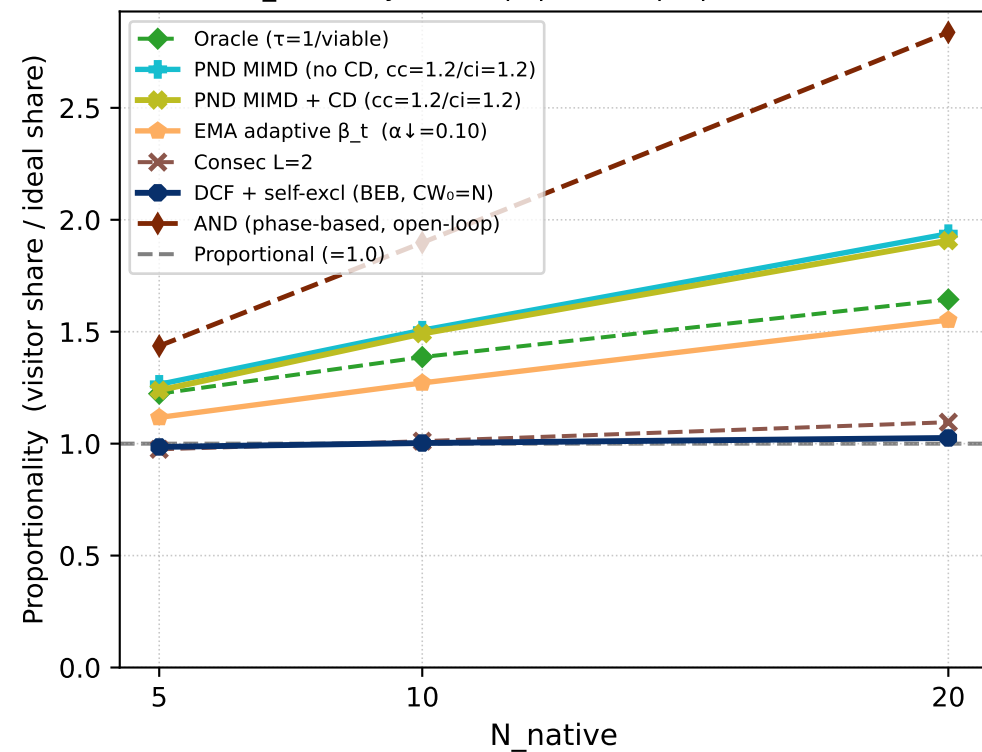

Fig. 21 Native vs. Visitor Fairness — Mixed NPCA Contention
($N_{\text{visitor}}=10$, $N_{\text{native}} \in [0, 5, 10, 20]$, bimodal visitor $\{4, 12\}$, native ppdu=6, PND cc=1.2/ci=1.2)

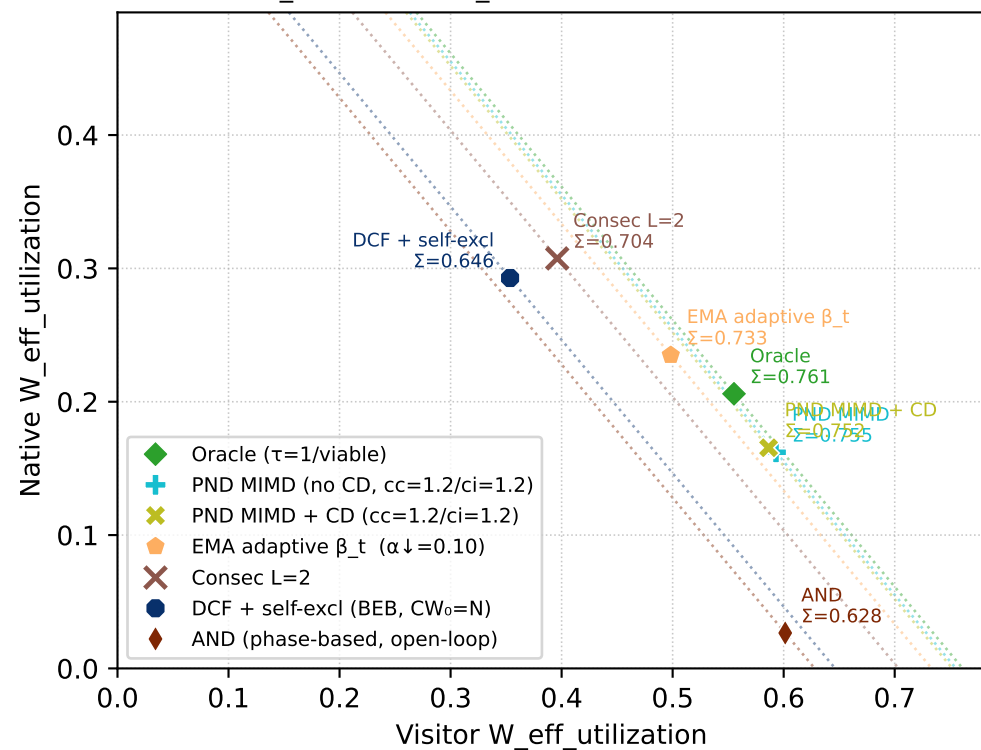

(a) Visitor TP vs N_{native}
($W_{\text{eff}}=50$, $N_{\text{visitor}}=10$, bimodal $\{4, 12\}$)

(b) Proportionality vs N_{native}
($W_{\text{eff}}=50$, $y=1.0$ = population-proportional fair)

(c) Visitor TP vs Native TP Scatter
($N_{\text{native}}=10$, $W_{\text{eff}}=50$, dashed = iso-total)

(d) Total TP vs N_{native}
($W_{\text{eff}}=50$, visitor+native combined)
